

# Butterfly Valves

GlobalHydro

EN

## Your benefits

- Highest efficiency
- Advanced design
- Optimized flow
- Enhanced safety

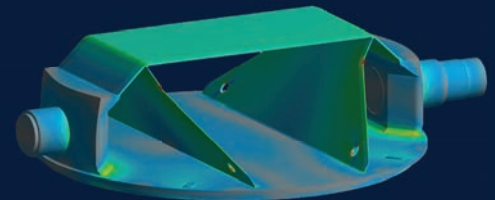

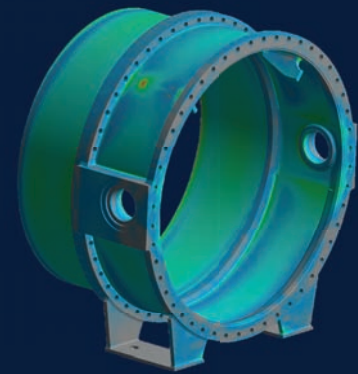

## Butterfly Valves designed and produced by GLOBAL Hydro

Together with our clients we strive for excellence. GLOBAL Hydro developed its own Butterfly Valves to secure the highest quality for one of the most critical components in terms of safety for high and medium head power plants. The enhanced design increases the reliability and longevity of the valve and optimizes the flow to improve operational performance. Full customized solutions for each project are being optimized through CFD calculations to provide optimal efficiency. Overall this leads to a longer lifetime of the power plant.

## Facts

- Welding construction
- Double eccentric design
- Force transmitted connection to the trunnion

## About GLOBAL Hydro

GLOBAL Hydro is a worldwide well-known name in the field of hydropower plant technology. Specializing in the engineering and manufacturing of turbines and control systems. GLOBAL Hydro offers sustainable package solution for the entire scope and lifecycle of a plant.

The company is continuously driving to develop sustainable technology, drawing inspiration from the natural power of water.
